

HOW TO:

Make a Bridge in Makachain

STEP BY STEP GUIDE

MAKA CHAIN

This guide provides step-by-step instructions on how to make a Bridge in the Makachain network from your MetaMask account.

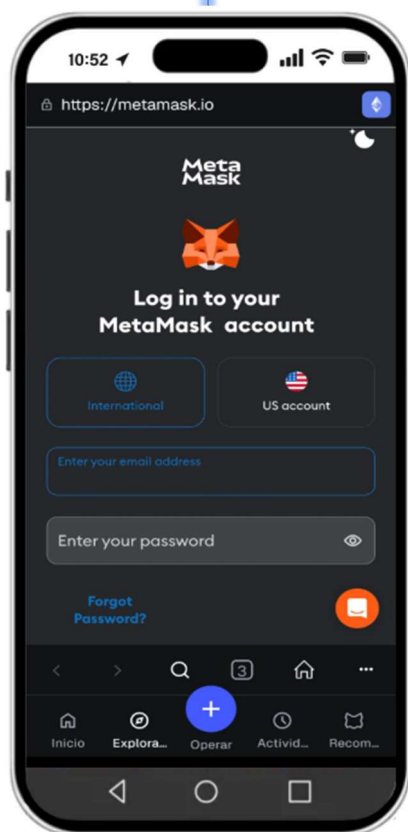

Before starting you will need
[Metamask.io](https://metamask.io)

Before you begin, make sure Makachain is added to your MetaMask wallet. If you already added it, you can skip to the step "B" (page 8)

A) Connect Makachain to your MetaMask wallet

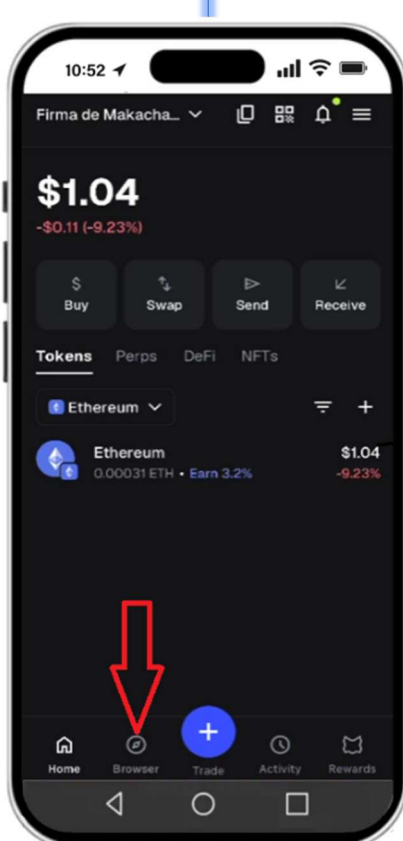

1

Log in to your MetaMask account, with your credentials

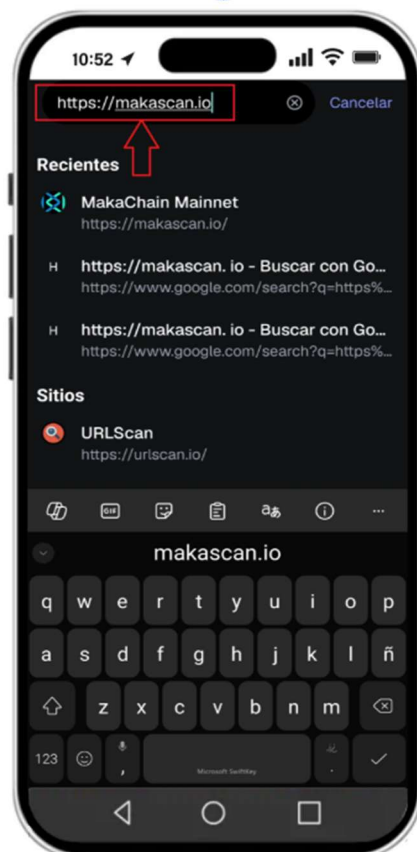

2

After logging in, click the Browser button,

3

In the URL bar, type https://makascan.io and press Enter.

makachain.io

4

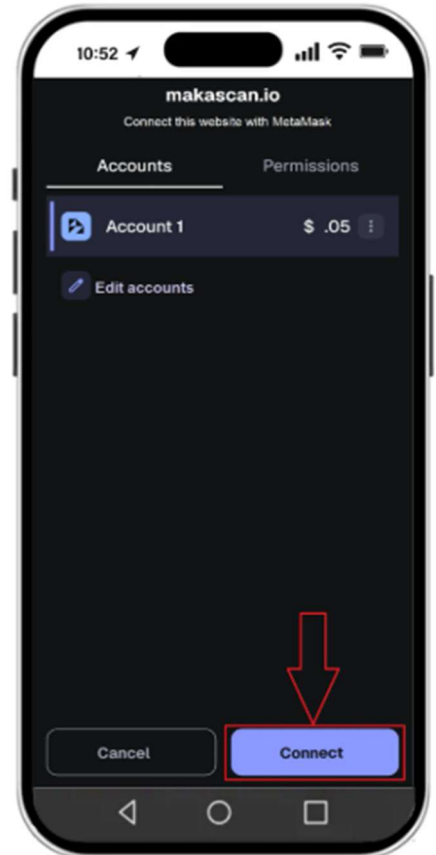

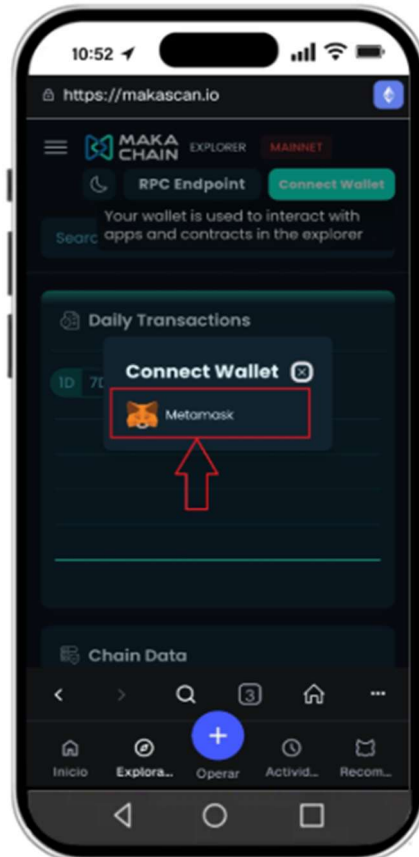

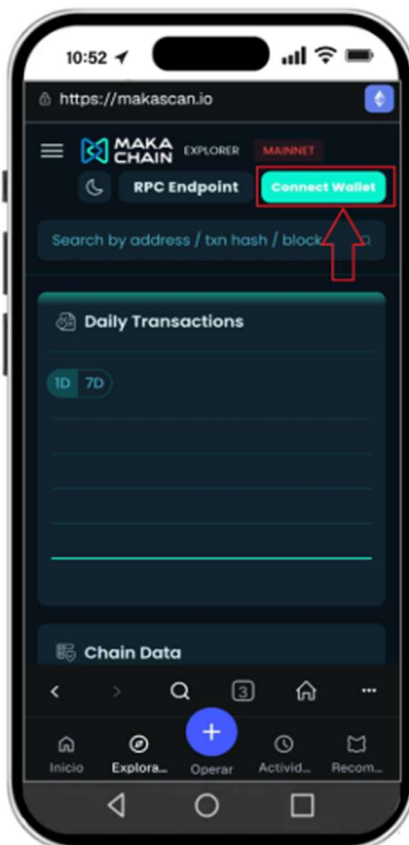

You will be redirected to the Makachain Explorer. Once there, click on the Connect Wallet button.

5

A Connect Wallet prompt will appear. When it does, click MetaMask.

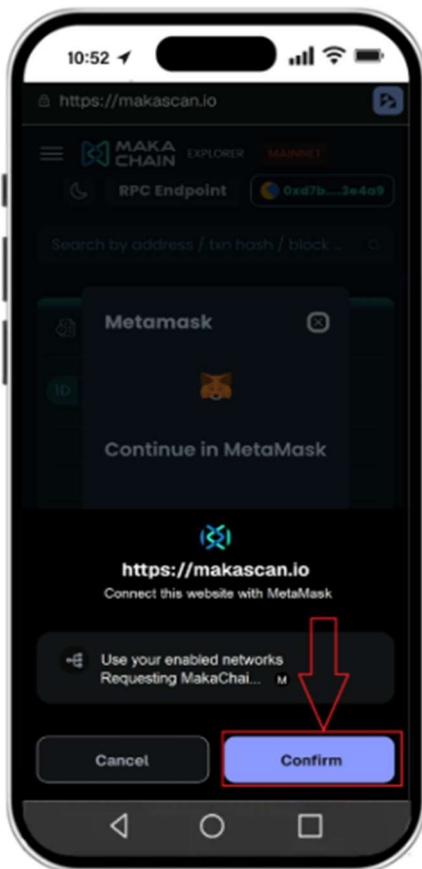

6

Click the Connect button.

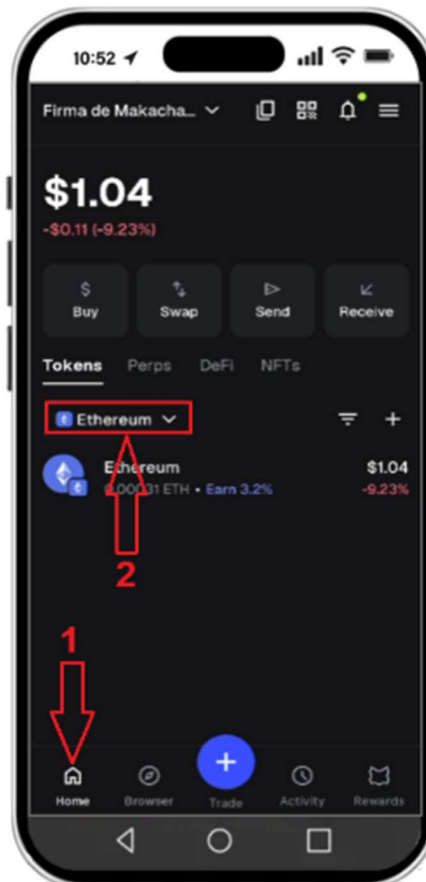

7

A confirmation message will appear. Click Confirm to continue. And the wallet will be added

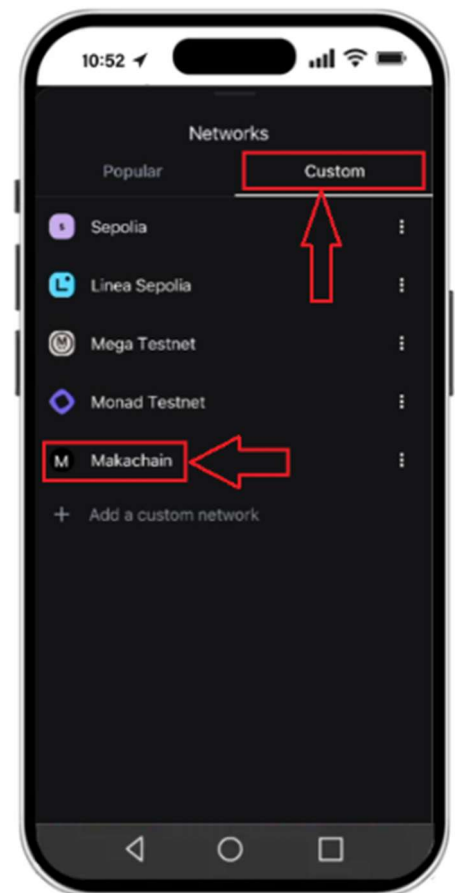

8

To locate the wallet in MetaMask, click the Home button, then click the Network button

9

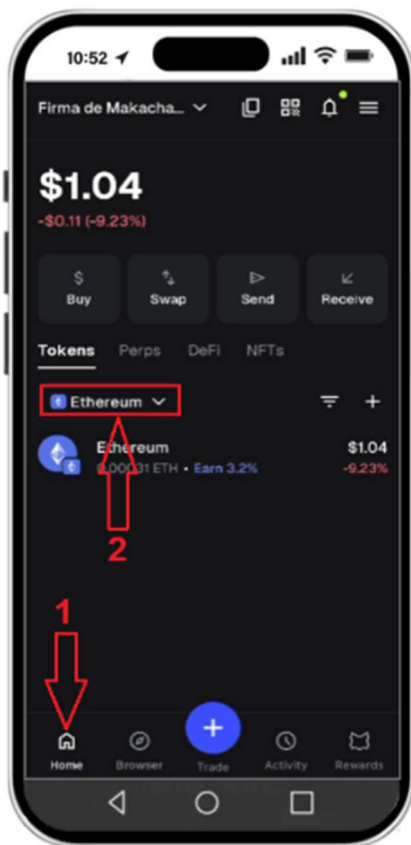

A list of networks will appear; click Custom to find the Makachain network.

Connect your MetaMask wallet to Makachain from your Browser or manually

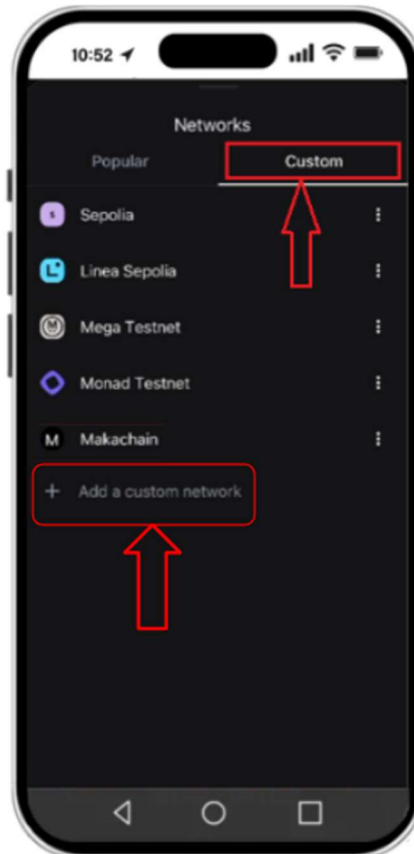

1

In your MetaMask account in the Home screen, click the Networks button.

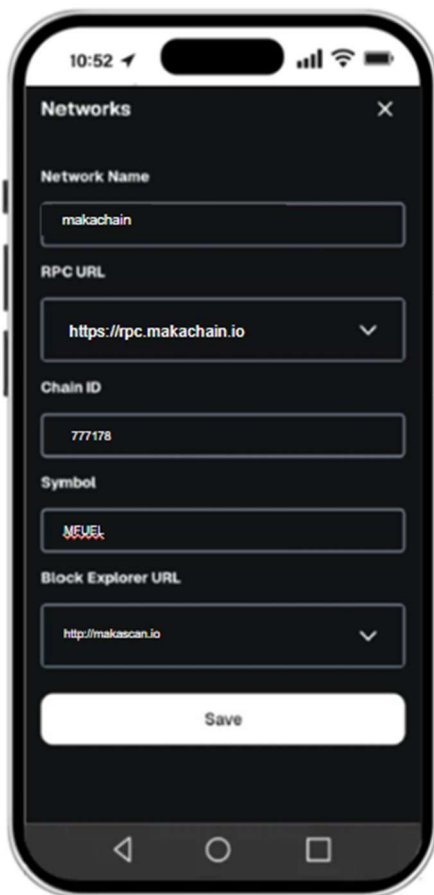

2

Then, click the Custom button, and select Add a custom network.

3

You will be taken to the section shown below, where you need to fill in each field with the following information.

Network name: makachain

RPC URL: <https://rpc.makachain.io>

Chain ID: 777178

Symbol: MFUEL

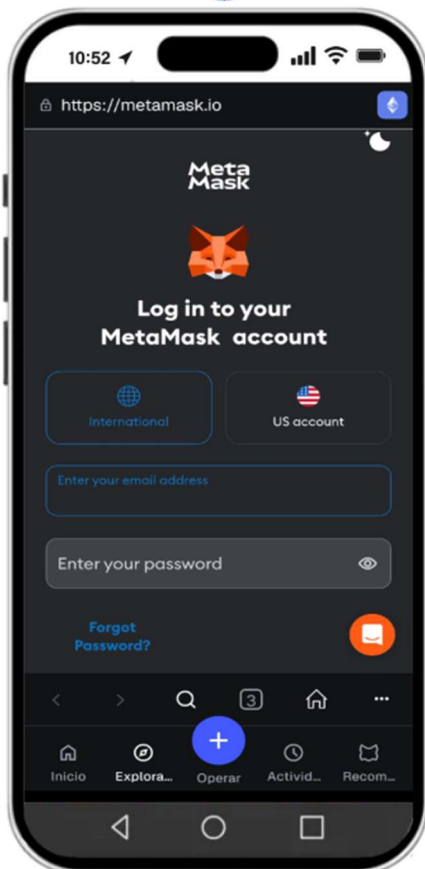

Block Explorer: <http://makascan.io>

After completing this, click Save, and the network will be added

B) How to make a Bridge in Makachain

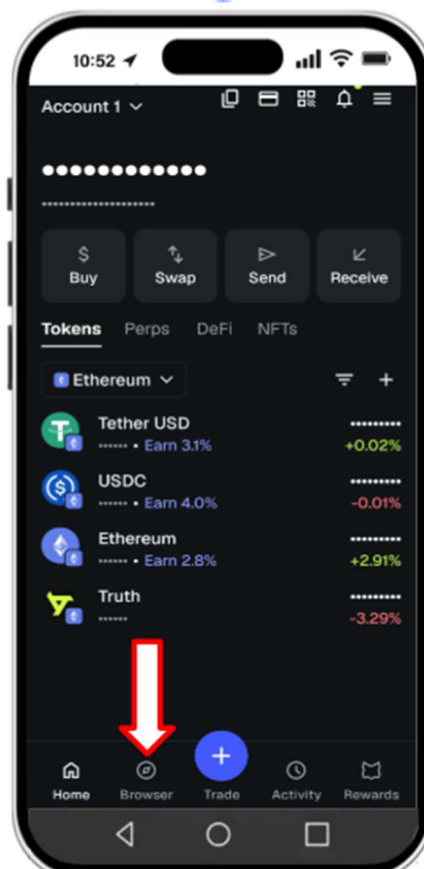

1

Log in to your MetaMask account, with your credentials

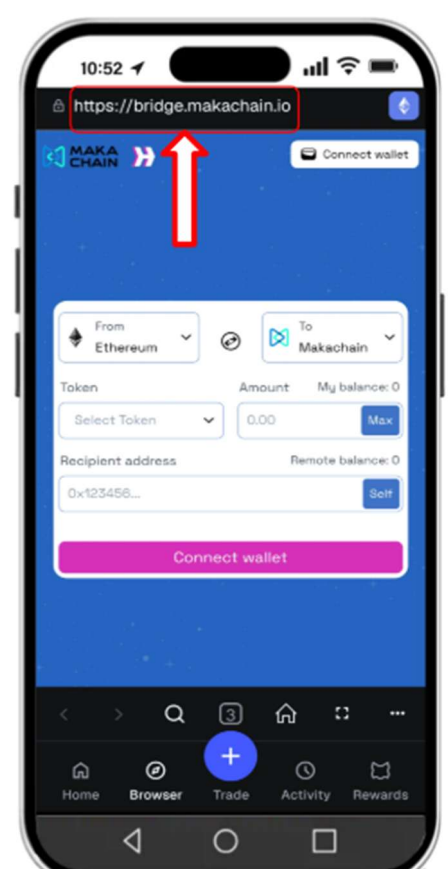

2

After logging in, click the Browser button,

3

In the URL bar, type <https://bridge.makachain.io> and press Enter.

makachain.io

4

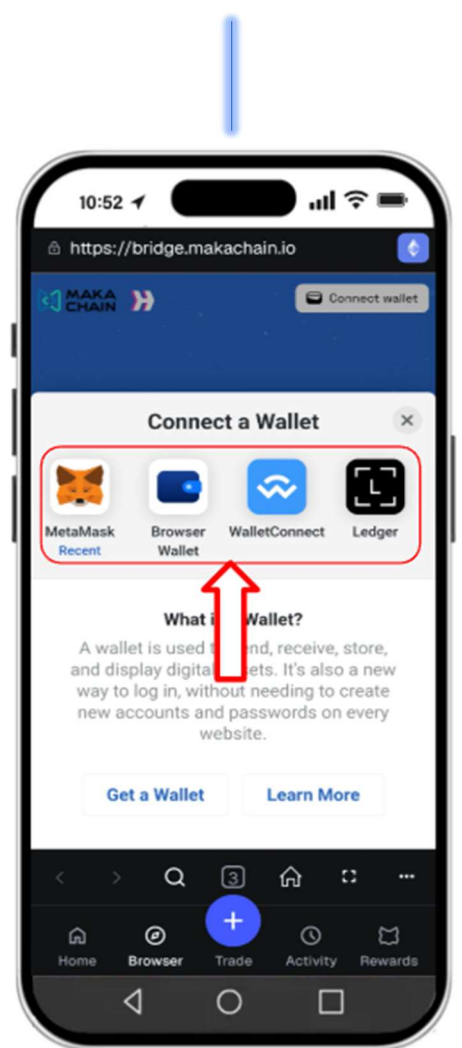

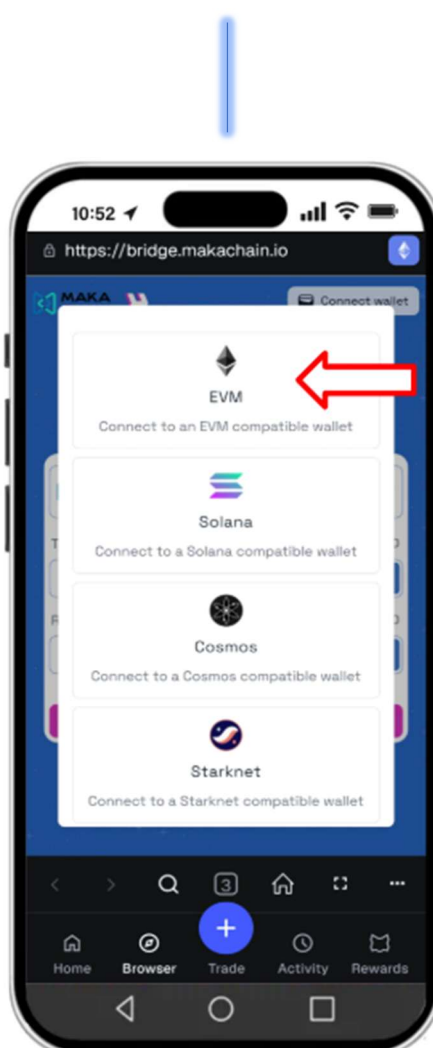

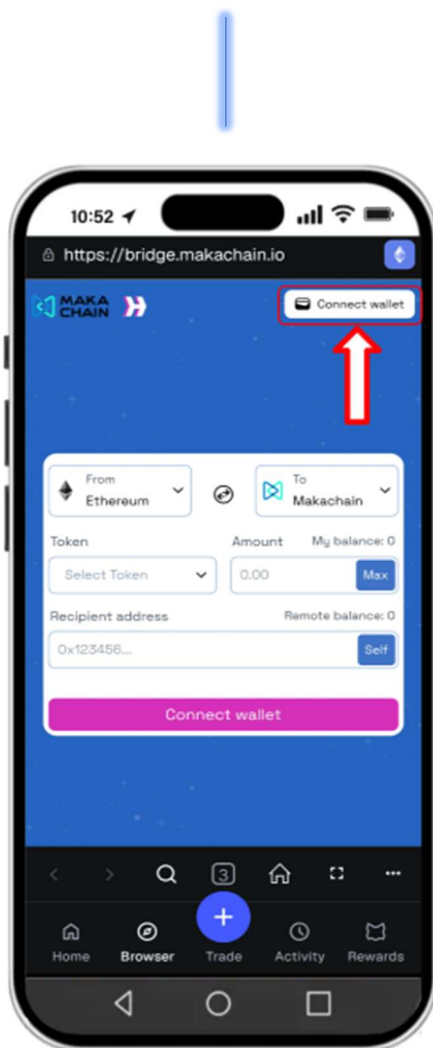

You will be redirected to the Makachain Bridge section. Once there, click on the Connect Wallet button.

5

A Connect network prompt will appear. Select the one you use

6

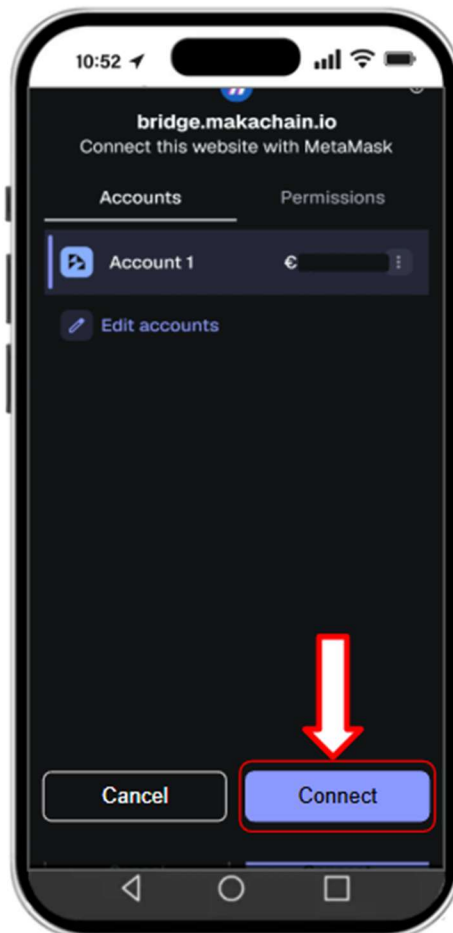

Select the wallet by tapping on the one you use, for this example we are using MetaMask

How to make a Bridge in Makachain

7

**You will be taken to the Connect
Your Wallet section. Click
Connect to continue.**

It is important to note that if you want to bridge to Makachain, you must first import the tokens into the Makachain network in your MetaMask wallet. Click Import Token, add the required token, and then proceed with the bridge (You can skip this step if you have already imported the token).

Token Contracts on Makachain:

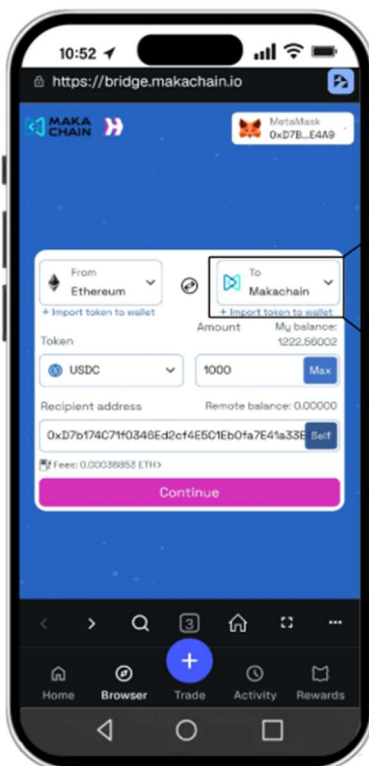

Maka: 0x85A53d0f8Ce34d5510917e8eC8603B7d1539611c

USDT: 0x30C28E393E0732335235685B345c95E6465Ad8A5

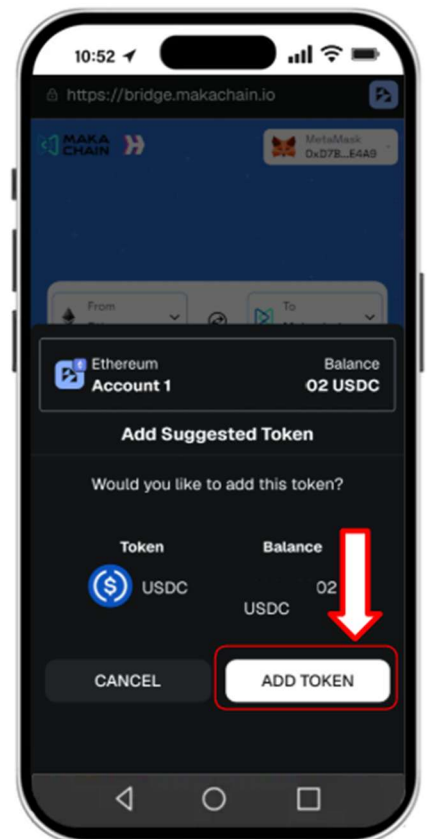

USDC: 0x1C978Ed2de920eA6c5844d011Ab9f574979F82A6

ARSe: 0xB82A23dD2C2F4cd25FDAf9027f7c7ca3e26BA511

8

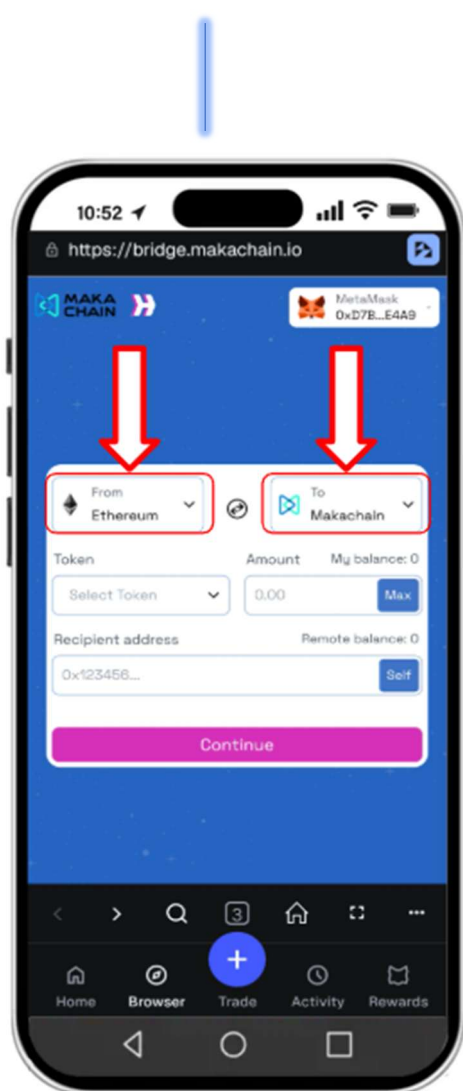

9

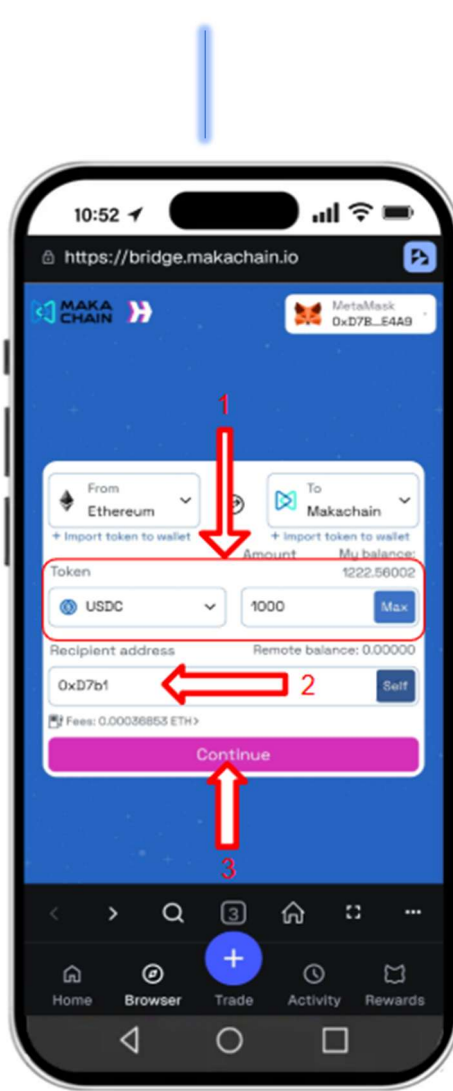

10

Select the network you want to bridge from and the network you want to bridge to

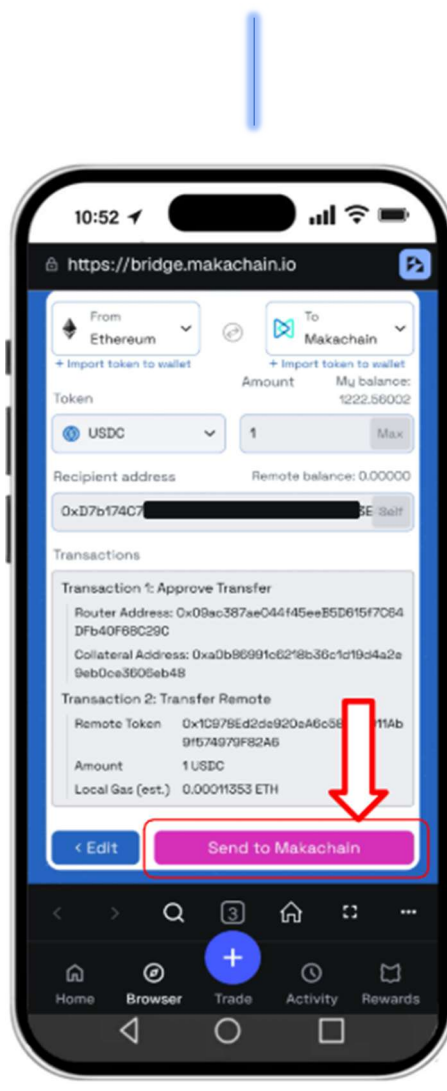

11

Select the coin and the amount. Then add the destination address and click on continue,

12

Click on Send to Makachain
