HOW TO CREATE A WALLET

STEP 1:

When you open the MakaWallet app for the first time, this screen will appear.

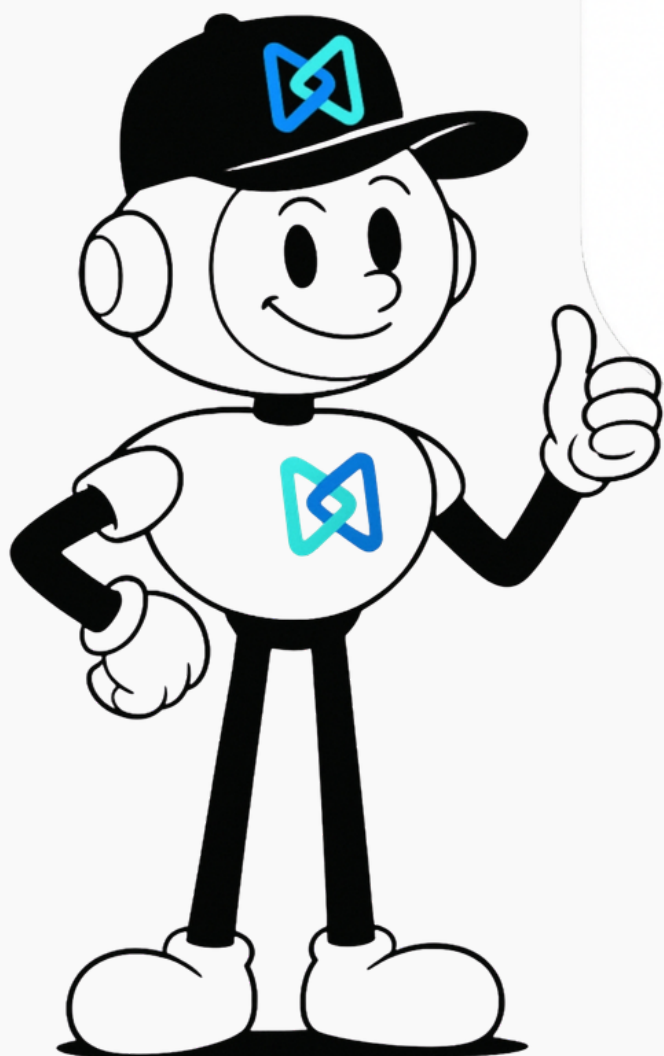

Click on "Create wallet."

HOW TO CREATE A WALLET

Each wallet contains 12 secret recovery phrases.

It is VERY IMPORTANT that these phrases are saved in the same order and in a place where no one else has access. Keep the words in a safe place and hidden from others.

REMINDER: This is your access to your wallet. If you lose your words, you CANNOT recover your wallet.

STEP 2:

This screen will appear with your secret (seed) recovery phrases.

Write your 12 word recovery (seed) phrases exactly as shown, in the same order as on your screen, and keep it somewhere safe. This is your access to your wallet. If you lose these words, you cannot recover your wallet.

Click "Ok, I saved it" when done.

STEP 3:

To verify that the words are written in the correct order, the system will prompt you with 4 tests.

In each test, select the correct answer and press "Continue."

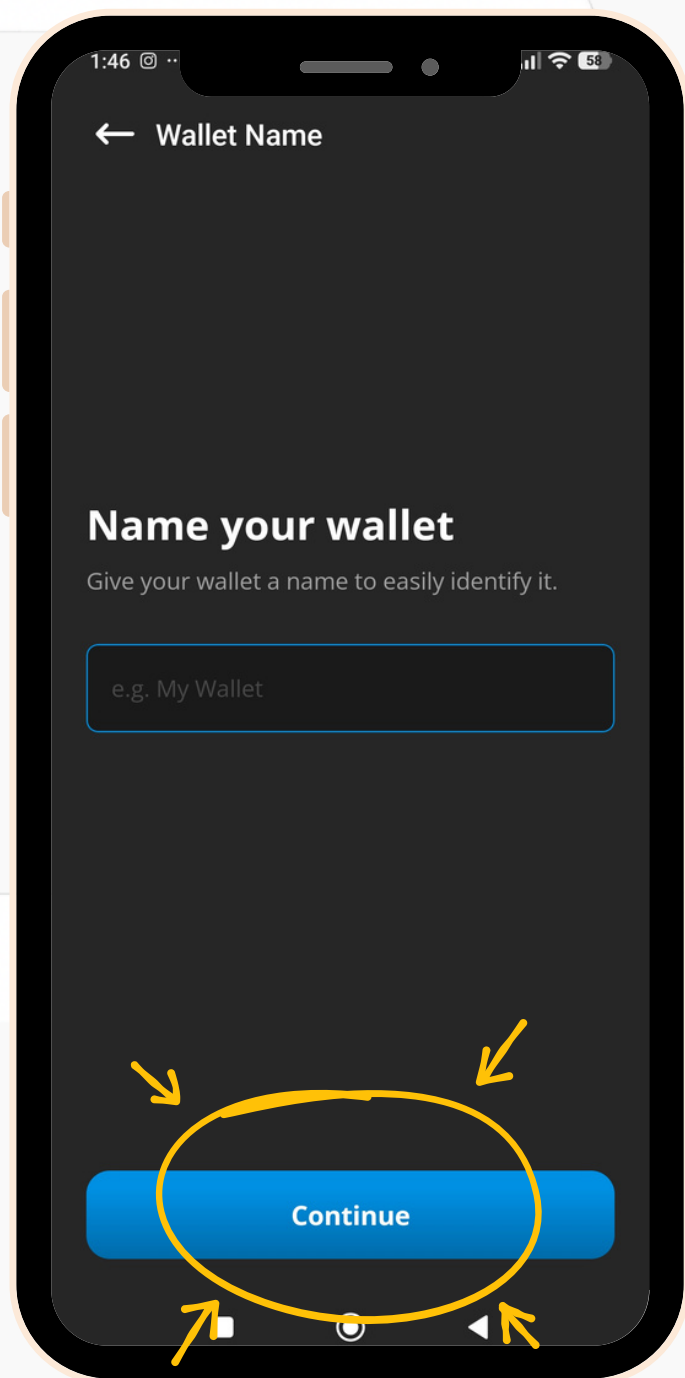

(In this example, it is asking for word 1, which on the previous screen was "POVERTY.")
